Architecting enterprise AI agents, multi-LLM platforms, and high-scale SaaS systems from zero to global scale.

01. AI & HIGH-SCALE SAAS PRODUCT LEADERSHIP

Enterprise AI Platforms, Autonomous Agents & Distributed Scale

- Scaled an enterprise AI agent & multi-LLM workspace (Bedrock, Vertex, OpenAI, Anthropic) to ~5,000 MAU.
- Architected permission-aware RAG pipelines, semantic routing, and automated enterprise SaaS workflows.
- Led .4B post-merger enterprise platform consolidation across Finance, HR, and IT with zero downtime.

02. ENTERPRISE PLATFORMS & MISSION-CRITICAL SYSTEMS

Elbit Systems & mPrest - Real-Time Command & Control (C2) & Data-Intensive Architecture

- Elbit Systems: Directed product strategy and system architecture for large-scale, data-intensive platforms.
- mPrest: Led product & architecture for distributed real-time C2 software with sub-second latency.
- Bridged multi-sensor telemetry, deterministic rule engines, and low-cognitive-load operator interfaces.

03. HIGH-STAKES EXECUTIVE & OPERATIONAL LEADERSHIP

Israeli Air Force (IAF) - Major (Res.) & Iron Dome Battery Commander

- Commanded 100+ officers, engineers, and operators across distributed real-time air-defense units.
- High-stakes decision-making, operational execution, and systems ownership under zero-error conditions.

CORE COMPETENCIES & ARCHITECTURE STACK

AI Agents & Multi-LLM Orchestration | Enterprise RAG & Knowledge Graphs | High-Scale SaaS & PLG
Distributed Real-Time Systems (C2) | Token Economics & Semantic Routing | Executive Team Leadership
